ESSENTIAL QUESTIONS	DOMAINS AND CLUSTERS	5 <sup>th</sup> GRADE MATH SKILLS	VOCABULARY	PRACTICES, RESOURCES & ASSESSMENT																
<p>Sample Questions Below:</p> <p>What can affect the relationship between numbers?</p> <p>What does a decimal represent?</p> <p>How do we compare decimals?</p> <p>How do we round decimals?</p> <p>What is a whole number?</p>	<p><b>Operations and Algebraic Thinking</b></p> <p>Write and interpret numerical expressions</p> <p>Analyze patterns and relationships</p>	<p align="center"><b>Introduced Skills</b></p> <table border="1" data-bbox="564 289 1478 337"> <tr> <td style="width: 20px;"></td> <td>Write exponents in expanded form</td> </tr> </table> <p align="center"><b>Reviewed Skills</b></p> <table border="1" data-bbox="564 418 1478 500"> <tr> <td style="width: 20px;"></td> <td>Write decimals in expanded form</td> </tr> <tr> <td style="width: 20px;"></td> <td>Identify Roman Numerals</td> </tr> </table> <p align="center"><b>Mastered Skills</b></p> <table border="1" data-bbox="564 573 1478 630"> <tr> <td style="width: 20px;"></td> <td>Fluently add and subtract multi-digit numbers</td> </tr> </table> <p align="center"><b>Reviewed Skills</b></p> <table border="1" data-bbox="564 735 1478 808"> <tr> <td style="width: 20px;"></td> <td>Represent whole-number products as rectangular areas in mathematical reasoning</td> </tr> </table> <p align="center"><b>Introduced Skills</b></p> <table border="1" data-bbox="564 971 1478 1247"> <tr> <td style="width: 20px;"></td> <td>Interpret models as products of whole numbers (i.e. describe a context in which a total number of objects can be expressed as <math>5 \times 7</math>)</td> </tr> <tr> <td style="width: 20px;"></td> <td>Interpret models as whole-number quotients of whole numbers (i.e. describe the context in which a number of shares or a number of groups can be expressed as <math>56 \div 8</math>)</td> </tr> <tr> <td style="width: 20px;"></td> <td>Explain division as an unknown-factor problem</td> </tr> </table>		Write exponents in expanded form		Write decimals in expanded form		Identify Roman Numerals		Fluently add and subtract multi-digit numbers		Represent whole-number products as rectangular areas in mathematical reasoning		Interpret models as products of whole numbers (i.e. describe a context in which a total number of objects can be expressed as $5 \times 7$ )		Interpret models as whole-number quotients of whole numbers (i.e. describe the context in which a number of shares or a number of groups can be expressed as $56 \div 8$ )		Explain division as an unknown-factor problem	<p><b>RIT 216-235 &amp; Above</b></p> <ul style="list-style-type: none"> <li>• Base</li> <li>• Composite figure</li> <li>• Congruent figure</li> <li>• Convert</li> <li>• Customary units</li> <li>• Degree (temp, geometry)</li> <li>• Equation</li> <li>• Evaluate</li> <li>• Height</li> <li>• Horizontal</li> <li>• Identity property</li> <li>• Inequality</li> <li>• Interval</li> <li>• Formula</li> <li>• Line segment</li> <li>• End point</li> <li>• Kilometer</li> <li>• Mass</li> <li>• Metric system</li> <li>• Prism</li> <li>• Volume</li> <li>• Diagram</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Improper fraction</li> <li>• Order of operations</li> </ul>	<ol style="list-style-type: none"> <li>1. Make sense of problems and persevere in solving them</li> <li>2. Reason abstractly and quantitatively</li> <li>3. Construct viable arguments and critique the reasoning of others</li> <li>4. Model with mathematics</li> <li>5. Use appropriate tools strategically</li> <li>6. Attend to precision</li> <li>7. Look for and make sense of structure</li> </ol>
	Write exponents in expanded form																			
	Write decimals in expanded form																			
	Identify Roman Numerals																			
	Fluently add and subtract multi-digit numbers																			
	Represent whole-number products as rectangular areas in mathematical reasoning																			
	Interpret models as products of whole numbers (i.e. describe a context in which a total number of objects can be expressed as $5 \times 7$ )																			
	Interpret models as whole-number quotients of whole numbers (i.e. describe the context in which a number of shares or a number of groups can be expressed as $56 \div 8$ )																			
	Explain division as an unknown-factor problem																			

ESSENTIAL QUESTIONS	DOMAINS AND CLUSTERS	5 <sup>th</sup> GRADE MATH SKILLS	VOCABULARY	PRACTICES, RESOURCES & ASSESSMENT																								
<p>What is a rational number?</p> <p>How do you show multiplying fractions in a visual model?</p>	<p><b>Operations and Algebraic Thinking</b></p>	<p style="text-align: center;"><b>Reviewed Skills</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 20px;"></td> <td>Multiply a whole number of up to four digits by a one-digit whole number</td> </tr> <tr> <td></td> <td>Multiply two two-digit numbers</td> </tr> <tr> <td></td> <td>Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors</td> </tr> <tr> <td></td> <td>Multiply multi-digit whole numbers</td> </tr> <tr> <td></td> <td>Divide multi-digit numbers</td> </tr> <tr> <td></td> <td>Apply the distributive property [i.e. <math>8(5+2)=(8 \times 5)+(8 \times 2) = 40+16 = 56</math>]</td> </tr> </table> <p style="text-align: center;"><b>Mastered Skills</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 20px;"></td> <td>Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities</td> </tr> <tr> <td></td> <td>Determine the unknown whole number in a multiplication or division equation relating three whole numbers (<math>8x=?=48</math>, <math>5=\square\square3</math>, <math>6x6=?</math>)</td> </tr> <tr> <td></td> <td>Apply the commutative property of multiplication (if <math>6 \times 4=24</math> then <math>4 \times 6=24</math>)</td> </tr> <tr> <td></td> <td>Apply the associative property of multiplication [i.e. <math>(3 \times 5)2=3(5 \times 2)=30</math>]</td> </tr> <tr> <td></td> <td>Fluently multiply and divide within 100 using fact families, relationships strategies or properties of operations</td> </tr> <tr> <td></td> <td>Know from memory all products of two one-digit numbers</td> </tr> </table>		Multiply a whole number of up to four digits by a one-digit whole number		Multiply two two-digit numbers		Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors		Multiply multi-digit whole numbers		Divide multi-digit numbers		Apply the distributive property [i.e. $8(5+2)=(8 \times 5)+(8 \times 2) = 40+16 = 56$ ]		Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities		Determine the unknown whole number in a multiplication or division equation relating three whole numbers ( $8x=?=48$ , $5=\square\square3$ , $6x6=?$ )		Apply the commutative property of multiplication (if $6 \times 4=24$ then $4 \times 6=24$ )		Apply the associative property of multiplication [i.e. $(3 \times 5)2=3(5 \times 2)=30$ ]		Fluently multiply and divide within 100 using fact families, relationships strategies or properties of operations		Know from memory all products of two one-digit numbers	<ul style="list-style-type: none"> <li>• Power of ten</li> <li>• Variable</li> <li>• Quadrant</li> <li>• Sequence</li> <li>• Reflection</li> <li>• Rational numbers</li> <li>• Unit fraction</li> <li>• Rate</li> </ul>	<p>8. 	Multiply a whole number of up to four digits by a one-digit whole number																											
	Multiply two two-digit numbers																											
	Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors																											
	Multiply multi-digit whole numbers																											
	Divide multi-digit numbers																											
	Apply the distributive property [i.e. $8(5+2)=(8 \times 5)+(8 \times 2) = 40+16 = 56$ ]																											
	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities																											
	Determine the unknown whole number in a multiplication or division equation relating three whole numbers ( $8x=?=48$ , $5=\square\square3$ , $6x6=?$ )																											
	Apply the commutative property of multiplication (if $6 \times 4=24$ then $4 \times 6=24$ )																											
	Apply the associative property of multiplication [i.e. $(3 \times 5)2=3(5 \times 2)=30$ ]																											
	Fluently multiply and divide within 100 using fact families, relationships strategies or properties of operations																											
	Know from memory all products of two one-digit numbers																											

ESSENTIAL QUESTIONS	DOMAINS AND CLUSTERS	5 <sup>th</sup> GRADE MATH SKILLS	VOCABULARY	PRACTICES, RESOURCES & ASSESSMENT																										
<p>What patterns occur in our number system?</p> <p>How do we convert measurements within a system?</p>	<p><b>Operations and Algebraic Thinking</b></p>	<p style="text-align: center;"><b>Reviewed Skills</b></p> <table border="1" style="width: 100%;"> <tr><td style="width: 20px;"></td><td>Solve word problems in which remainders must be interpreted</td></tr> <tr><td></td><td>Represent verbal statements of comparisons as equations</td></tr> <tr><td></td><td>Multiply and divide to solve word problems involving multiplicative comparisons</td></tr> <tr><td></td><td>Assess the reasonableness of answers using mental computation and estimation strategies (including rounding)</td></tr> <tr><td></td><td>Use parentheses, brackets or braces in numerical expressions and evaluate expressions with these symbols</td></tr> </table> <p style="text-align: center;"><b>Mastered Skills</b></p> <table border="1" style="width: 100%;"> <tr><td style="width: 20px;"></td><td>Solve multi-step word problems using the four operations</td></tr> <tr><td></td><td>Solve problems involving integers using the four operations</td></tr> </table> <p style="text-align: center;"><b>Introduced Skills</b></p> <table border="1" style="width: 100%;"> <tr><td style="width: 20px;"></td><td>Find the greatest common factor of two whole numbers less than or equal to 100</td></tr> <tr><td></td><td>Find the least common multiple of two whole numbers less than or equal to 12</td></tr> </table> <p style="text-align: center;"><b>Reviewed Skills</b></p> <table border="1" style="width: 100%;"> <tr><td style="width: 20px;"></td><td>Find all factors for a whole number in the range 1-100</td></tr> <tr><td></td><td>Recognize that a whole number is a multiple of each of its factors</td></tr> <tr><td></td><td>Determine whether a given whole number is divisible by a given one digit number</td></tr> <tr><td></td><td>Determine whether a given whole number in the range of 1-100 is prime or composite</td></tr> </table>		Solve word problems in which remainders must be interpreted		Represent verbal statements of comparisons as equations		Multiply and divide to solve word problems involving multiplicative comparisons		Assess the reasonableness of answers using mental computation and estimation strategies (including rounding)		Use parentheses, brackets or braces in numerical expressions and evaluate expressions with these symbols		Solve multi-step word problems using the four operations		Solve problems involving integers using the four operations		Find the greatest common factor of two whole numbers less than or equal to 100		Find the least common multiple of two whole numbers less than or equal to 12		Find all factors for a whole number in the range 1-100		Recognize that a whole number is a multiple of each of its factors		Determine whether a given whole number is divisible by a given one digit number		Determine whether a given whole number in the range of 1-100 is prime or composite		
	Solve word problems in which remainders must be interpreted																													
	Represent verbal statements of comparisons as equations																													
	Multiply and divide to solve word problems involving multiplicative comparisons																													
	Assess the reasonableness of answers using mental computation and estimation strategies (including rounding)																													
	Use parentheses, brackets or braces in numerical expressions and evaluate expressions with these symbols																													
	Solve multi-step word problems using the four operations																													
	Solve problems involving integers using the four operations																													
	Find the greatest common factor of two whole numbers less than or equal to 100																													
	Find the least common multiple of two whole numbers less than or equal to 12																													
	Find all factors for a whole number in the range 1-100																													
	Recognize that a whole number is a multiple of each of its factors																													
	Determine whether a given whole number is divisible by a given one digit number																													
	Determine whether a given whole number in the range of 1-100 is prime or composite																													

ESSENTIAL QUESTIONS	DOMAINS AND CLUSTERS	5 <sup>th</sup> GRADE MATH SKILLS	VOCABULARY	PRACTICES, RESOURCES & ASSESSMENT																										
	<p><b><i>Operations and Algebraic Thinking</i></b></p>	<p style="text-align: center;"><b>Introduced Skills</b></p> <table border="1" style="width: 100%;"> <tr> <td style="width: 20px;"></td> <td>Generate two numerical patterns using two given rules</td> </tr> <tr> <td></td> <td>Identify apparent relationships between corresponding terms</td> </tr> <tr> <td></td> <td>Form ordered pairs consisting of corresponding terms from two patterns and graph the ordered pairs on a coordinate plane</td> </tr> </table> <p style="text-align: center;"><b>Reviewed Skills</b></p> <table border="1" style="width: 100%;"> <tr> <td style="width: 20px;"></td> <td>Identify apparent features of a pattern without a given rule</td> </tr> </table> <p style="text-align: center;"><b>Introduced Skills</b></p> <table border="1" style="width: 100%;"> <tr> <td style="width: 20px;"></td> <td>Explain the concept of a ratio</td> </tr> <tr> <td></td> <td>Use ratio language to describe ratio relationship between two quantities</td> </tr> <tr> <td></td> <td>Find a percent of a quantity as a rate per 100 (i.e. 30% of a quantity)</td> </tr> </table> <p style="text-align: center;"><b>Introduced Skills</b></p> <table border="1" style="width: 100%;"> <tr> <td style="width: 20px;"></td> <td>Explain that positive and negative numbers are used together to describe quantities having opposite directions of values</td> </tr> <tr> <td></td> <td>Use positive and negative numbers to represent quantities in real-world contexts explaining the meaning of 0 in each situation</td> </tr> <tr> <td></td> <td>Use a rational number as a point on the number line</td> </tr> <tr> <td></td> <td>Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line</td> </tr> <tr> <td></td> <td>Recognize that the opposite of the opposite of a number is the number itself</td> </tr> <tr> <td></td> <td>Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane</td> </tr> </table>		Generate two numerical patterns using two given rules		Identify apparent relationships between corresponding terms		Form ordered pairs consisting of corresponding terms from two patterns and graph the ordered pairs on a coordinate plane		Identify apparent features of a pattern without a given rule		Explain the concept of a ratio		Use ratio language to describe ratio relationship between two quantities		Find a percent of a quantity as a rate per 100 (i.e. 30% of a quantity)		Explain that positive and negative numbers are used together to describe quantities having opposite directions of values		Use positive and negative numbers to represent quantities in real-world contexts explaining the meaning of 0 in each situation		Use a rational number as a point on the number line		Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line		Recognize that the opposite of the opposite of a number is the number itself		Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane		
	Generate two numerical patterns using two given rules																													
	Identify apparent relationships between corresponding terms																													
	Form ordered pairs consisting of corresponding terms from two patterns and graph the ordered pairs on a coordinate plane																													
	Identify apparent features of a pattern without a given rule																													
	Explain the concept of a ratio																													
	Use ratio language to describe ratio relationship between two quantities																													
	Find a percent of a quantity as a rate per 100 (i.e. 30% of a quantity)																													
	Explain that positive and negative numbers are used together to describe quantities having opposite directions of values																													
	Use positive and negative numbers to represent quantities in real-world contexts explaining the meaning of 0 in each situation																													
	Use a rational number as a point on the number line																													
	Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line																													
	Recognize that the opposite of the opposite of a number is the number itself																													
	Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane																													

ESSENTIAL QUESTIONS	DOMAINS AND CLUSTERS	5 <sup>th</sup> GRADE MATH SKILLS	VOCABULARY	PRACTICES, RESOURCES & ASSESSMENT																												
	<p><b><i>Operations and Algebraic Thinking</i></b></p>	<p style="text-align: center;"><b>Introduced Skills</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 20px;"></td> <td>Recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes</td> </tr> <tr> <td></td> <td>Find and position pairs of integers and other rational numbers on a coordinate plane</td> </tr> <tr> <td></td> <td>Explain ordering and absolute value of rational numbers</td> </tr> <tr> <td></td> <td>Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram</td> </tr> <tr> <td></td> <td>Write, interpret and explain statements of order for rational numbers in real-world contexts (i.e. write <math>-3^{\circ}\text{C} &gt; -7^{\circ}\text{C}</math> to express the fact that <math>-3^{\circ}\text{C}</math> is warmer than <math>-7^{\circ}\text{C}</math>)</td> </tr> <tr> <td></td> <td>Describe the absolute value of a rational number as its distance from 0 on the number line</td> </tr> <tr> <td></td> <td>Interpret absolute value as magnitude for a positive or negative quantity in a real-world situation</td> </tr> <tr> <td></td> <td>Apply and extend previous understandings to add and subtract rational numbers</td> </tr> <tr> <td></td> <td>Represent addition and subtraction on a horizontal or vertical number line diagram</td> </tr> <tr> <td></td> <td>Describe situations in which opposite quantities combine to make 0.</td> </tr> <tr> <td></td> <td>Demonstrate <math>p+q</math> as the number located a distance <math> q </math> from <math>p</math> in the positive or negative direction depending on whether <math>q</math> is positive or negative</td> </tr> <tr> <td></td> <td>Interpret the sums of rational numbers by describing real-world contexts</td> </tr> <tr> <td></td> <td>Demonstrate subtraction of rational numbers as using the additive inverse, <math>p-q=p+(-q)</math></td> </tr> <tr> <td></td> <td>Show that the distance between two rational numbers on the number line is the absolute value of their difference</td> </tr> </table>		Recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes		Find and position pairs of integers and other rational numbers on a coordinate plane		Explain ordering and absolute value of rational numbers		Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram		Write, interpret and explain statements of order for rational numbers in real-world contexts (i.e. write $-3^{\circ}\text{C} > -7^{\circ}\text{C}$ to express the fact that $-3^{\circ}\text{C}$ is warmer than $-7^{\circ}\text{C}$ )		Describe the absolute value of a rational number as its distance from 0 on the number line		Interpret absolute value as magnitude for a positive or negative quantity in a real-world situation		Apply and extend previous understandings to add and subtract rational numbers		Represent addition and subtraction on a horizontal or vertical number line diagram		Describe situations in which opposite quantities combine to make 0.		Demonstrate $p+q$ as the number located a distance $ q $ from $p$ in the positive or negative direction depending on whether $q$ is positive or negative		Interpret the sums of rational numbers by describing real-world contexts		Demonstrate subtraction of rational numbers as using the additive inverse, $p-q=p+(-q)$		Show that the distance between two rational numbers on the number line is the absolute value of their difference		
	Recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes																															
	Find and position pairs of integers and other rational numbers on a coordinate plane																															
	Explain ordering and absolute value of rational numbers																															
	Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram																															
	Write, interpret and explain statements of order for rational numbers in real-world contexts (i.e. write $-3^{\circ}\text{C} > -7^{\circ}\text{C}$ to express the fact that $-3^{\circ}\text{C}$ is warmer than $-7^{\circ}\text{C}$ )																															
	Describe the absolute value of a rational number as its distance from 0 on the number line																															
	Interpret absolute value as magnitude for a positive or negative quantity in a real-world situation																															
	Apply and extend previous understandings to add and subtract rational numbers																															
	Represent addition and subtraction on a horizontal or vertical number line diagram																															
	Describe situations in which opposite quantities combine to make 0.																															
	Demonstrate $p+q$ as the number located a distance $ q $ from $p$ in the positive or negative direction depending on whether $q$ is positive or negative																															
	Interpret the sums of rational numbers by describing real-world contexts																															
	Demonstrate subtraction of rational numbers as using the additive inverse, $p-q=p+(-q)$																															
	Show that the distance between two rational numbers on the number line is the absolute value of their difference
